## Accounting Research Manager® Knowledge-Based Audits™ for Employee Benefit Plans **NEW!**

The effective, affordable solution for identifying risk and complying with GAAS

Accounting Research Manager Knowledge-Based Audits (KBA) for Employee Benefit Plans utilizes CCH's exclusive KBA methodology to help you efficiently and effectively perform financial statement audits of employee benefit plans. It's the most accurate and affordable way to be in compliance with Generally Accepted Auditing Standards (GAAS).

### AVOID RISKS ASSOCIATED WITH EMPLOYEE BENEFIT PLANS

The more accurately you can assess a company's risk of material misstatement, the more assurance you'll have that the procedures performed in response to the risk assessments will detect misstatements.

Knowledge-Based Audits for Employee Benefit Plans™ provides more than 175 risk assessment forms and practice aids that guide you through the nine critical Knowledge-Based Audit processes:

- Pre-Engagement Procedures
- Risk Assessment Procedures: Obtaining an Understanding of the Entity and Its Environment
- Risk Assessment Procedures: Evaluating the Design of Internal Controls
- Assessing the Risks of Material Misstatement
- Performing Audit Procedures in Response to Assessed Risks
- Performing Audit Procedures: Tests of the Operating Effectiveness of Internal Controls
- Performing Audit Procedures: Substantive Tests
- Evaluating, Concluding, and Reporting Procedures
- Audit Documentation Requirements

### CHOOSE A FORMAT THAT SUITS YOUR NEEDS

Knowledge-Based Audits for Employee Benefit Plans provides you with all the information you need to effectively identify and comply with GAAS — for only \$249! It is available as an add-on to any Accounting Research Manager audit subscription.

**ONLY  
\$249!**

In addition, Knowledge-Based Audits for Employee Benefit Plans is available as an add-on to ProSystem fx® Engagement, the industry's most widely used paperless workpaper management and trial balance tool for increasing your productivity through paperless audits. You'll streamline your workflow with the integration of the interactive version of Knowledge-Based Audits of Employee Benefit Plans or Knowledge Tools and ProSystem fx Engagement.

### ENSURE EFFECTIVENESS WITH KNOWLEDGE-BASED AUDITS

Developed by CCH, the KBA methodology focuses on information flow rather than on document flow. This improves communication between engagement members and supports ongoing evaluation of procedures, so you're better able to make informed risk assessments using your own professional judgment and expertise.

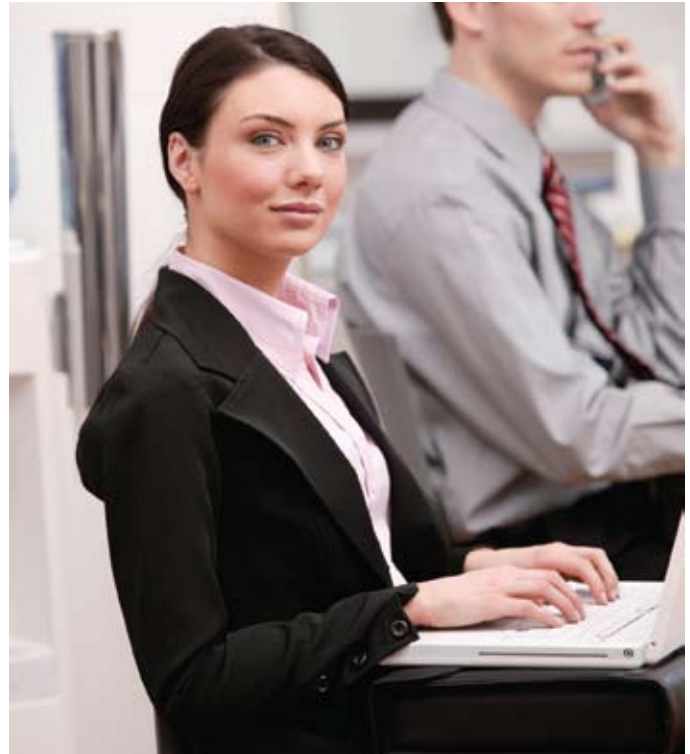

The results from each audit stage feed into a Communications Hub that enables all audit team members to easily view summaries of the significant matters, risks and findings discovered in the audit. This ensures that important information is not overlooked or hidden in the details of numerous checklists and forms.

## THE MOST COMPREHENSIVE AND TIMELY FINANCIAL REPORTING DATABASE

Accounting Research Manager is the most comprehensive financial reporting online database. It provides access to authoritative literature and expert-written interpretive guidance, giving you the full range of in-depth materials necessary to understand and conduct accounting and audit functions. In fact, over 72% of the Top CPA firms are using this product every day to gain a clearer understanding of all the rapidly-changing accounting, auditing, governmental and SEC standards.

In addition, Accounting Research Manager provides the timeliest reporting to ensure that you are always up-to-date with the developments.

- ARM Daily News delivers the latest news directly to your email
- Daily updates within the database meet awareness needs
- Weekly Summary email alerts covers financial reporting developments of the week, with links to more information within the product
- The What's New Checklist is a rolling 3 and 15-month checklist that notifies you of recent changes in U.S. and international accounting principles
